

Author check list

Before uploading your documents into ScholarOne, please check you have included the following information:

Manuscript is within journal scope and aligns with one of the article types published by *Public Health Research & Practice*

Manuscript is formatted as outlined on page 4 of the journal's Author guidelines

Covering letter contains appropriate author identification and affiliations (you will also be asked to submit author information online in ScholarOne). You will be prompted to include an authorship declaration online via ScholarOne, rather than uploading as a separate document

Conflict of interest declaration completed by each individual author and Licence to publish form signed by corresponding author (these are available via the journal website (www.phrp.com.au/about-us/editorial-policies) or can be downloaded from ScholarOne)

Conflict of interest text statement prepared by corresponding author if authors have conflicts to declare (this will be entered online via ScholarOne)

Author details are complete, including names (with middle initials), qualifications, positions, and contact details, including email addresses and phone numbers

Corresponding author identified in the above list, with email address

Authorship statement detailing each author contribution prepared by corresponding author

Key points box summarising the key messages of the paper is included (maximum 75 words)

Figures and images supplied in the appropriate format and attached separately and not in the body of the manuscript text

Tables and boxes are labelled sequentially and indications provided throughout the text as to where tables and boxes should appear

Word count (including abstract, key points and tables) accords with the journal's Author guidelines for the type of article being submitted

Number of references, graphs, tables and charts accords with Author guidelines

Pages numbered

Evidence of ethics approval if relevant

Appropriate clearances for material received from authors' directors or supervisors

Copies included of published or in-press articles based on the same research data (please include as separate files)

Material covered by copyright restrictions that forms part of the submitted work identified and attributed and appropriate copyright permissions obtained

Research articles include all five components, plus structured abstract and key points box

Research articles follow any relevant internationally relevant reporting guidelines (see Author guidelines)

Abstracts are supplied in appropriate format depending on the type of article submitted

Letters are submitted within the submission period (eight weeks)

Track changes and other mark-ups removed

Acknowledgements included before the references if needed

Ensure references have been checked for accuracy

References, if included in figures, images, tables and boxes, are correctly numbered in the reference list and not placed at the end of the list.
