The objectives of this plan are to: coordinative teams, and reducing health inequalities. These areas, and their evidence suggests are instrumental to improving health virtual networks in a few key subject areas that the Functioning as an institute without walls, HIRC is building HIRC’s contribution to building capacity in relation to health inequalities research and development is articulated in its Strategic Action Plan 2001–2003. The key objectives of this plan are to:

- increase the national focus on reducing health inequalities;
- build national capacity and support for research and development in health inequalities;
- establish close collaboration among researchers, practitioners, and policy developers;
- promote the uptake of research findings in policy, practice, and evaluation.

Functioning as an institute without walls, HIRC is building virtual networks in a few key subject areas that the evidence suggests are instrumental to improving health and reducing health inequalities. These areas, and their coordinating teams, are:

- **Children, Youth and Families**—coordinated by Jan Nicholson, School of Public Health Research, Queensland University of Technology; Elizabeth Waters, Murdoch Children’s Research Institute; and Graham Vimpani, University of Newcastle;
- **Primary Health Care**—coordinated by Elizabeth Harris, Centre for Health Equity Research, Training and Evaluation; John Furler, Department of General Practice, University of Melbourne; and Julie McDonald, network coordinator and private consultant;
- **Sustainable Communities**—coordinated by Pierre Horwitz, Edith Cowan University.

The three HIRC networks will be responsible for:

- establishing and maintaining a comprehensive and viable research network, and addressing rural health and the health of indigenous Australians;
- providing expert advice on priority research topics, questions, and related matters. This includes advice on the evidence for effective interventions;
- facilitating communication and collaboration between network members and other individuals and groups;
- undertaking activities to build capacity in research concerning health inequalities as it applies to the subject areas.

The HIRC will be judged against the following indicators:

- improved investment in health inequalities research by government and non-government organisations;
- research funding bodies accounting for what they spend on health inequalities;
- increased efforts at all levels to intervene to reduce health inequalities, as described in the published and unpublished literature;
- acknowledgement from indigenous Australian health organisations that HIRC has contributed to the effort to reduce health inequalities;
- effective network relationships between researchers, practitioners, and policy makers, as indicated by the activities of the HIRC-sponsored networks.

Researchers and others interested in the subject areas covered by the three HIRC networks welcome to contact the network coordinators. For general information about HIRC, and how to contact the network coordinators, contact Helen Catchatoor, HIRC Secretariat by email at helen.catchatoor@health.gov.au or visit the HIRC Web site at www.hirc.health.gov.au.
