## Special issue on HIV in NSW in 2010

- 49 HIV in NSW in 2010: sustaining success in an evolving epidemic**  
**Guest editorial**  
 Introduces the issue and describes how HIV has affected populations identified as priorities for prevention and how the current public health and clinical response to HIV has achieved stable rates of infection in NSW.  
 Darryl O'Donnell, Andrew Grulich, Roger Garsia, Nicolas Parkhill, Kim Browne
- 54 Rhythm of life: choices, challenges and change**  
 Presents the HIV epidemic from the unique personal perspective of a man living with HIV.  
 Rob Lake
- 55 How does the HIV epidemic in NSW compare to other Australian jurisdictions and internationally?**  
 Describes the epidemiology of HIV in NSW in 2010, with national and international comparative data.  
 Michelle E. McPherson, Kate A. Ward
- 61 The economics of HIV prevention strategies in NSW**  
 Presents an epidemiological and economic analysis of HIV public health measures in NSW.  
 James R. Hales
- 65 Gay men: current challenges and emerging approaches in HIV prevention**  
 Describes how gay men have responded to HIV and the sustained protective sexual and testing behaviours which have kept the state's incidence rates low among this population.  
 John B. F. de Wit, Garrett P. Prestage, Ian R. Duffin
- 69 The effectiveness of harm reduction in preventing HIV among injecting drug users**  
 Reports evidence of the effectiveness of harm reduction in preventing HIV infection among injecting drug users.  
 Alex Wodak, Lisa Maher
- 74 Improving the health of sex workers in NSW: maintaining success**  
 Reports low rates of HIV and sexually transmissible infections among brothel-based sex workers.  
 Basil Donovan, Christine Harcourt, Sandra Egger, Christopher K. Fairley
- 78 Guarding against an HIV epidemic within an Aboriginal community and cultural framework; lessons from NSW**  
 Reviews the national epidemiology of HIV in Aboriginal communities and discusses the NSW strategic response to this.  
 James Ward, Snehal P. Akre, John M. Kaldor
- 83 Guarding against emerging epidemics: addressing HIV and AIDS among culturally and linguistically diverse communities in NSW**  
 Describes the prevalence of HIV in NSW's culturally diverse communities and the application of a cultural competency framework to re-orientate population health services to meet their needs.  
 Tadgh McMahon, Renee J. Moreton, Barbara N. Luisi
- 86 Advances in HIV laboratory testing**  
 Introduces the laboratory assays used in the diagnosis and treatment of HIV in NSW.  
 Dominic E. Dwyer
- 89 HIV treatment, care and support in NSW: a work necessarily still in progress**  
 Reviews the evolving clinical response of HIV infection in primary, allied and tertiary health services since the 1980s.  
 Roger Garsia
- 93 Clinical research in NSW: its role in HIV care and prevention**  
 Describes the contribution that clinical research in NSW has made to understanding the HIV epidemic and the optimal treatment of patients.  
 Damien V. Cordery, David A. Cooper
- 96 Surveillance, epidemiology and behavioural research to guide HIV prevention policy**  
 Provides examples of evidence-based policy making for HIV prevention in NSW.  
 Andrew Grulich, Darryl O'Donnell, John B. F. de Wit
- 97 Public health law, human rights and HIV: a work in progress**  
 Describes the role of law reform in supporting HIV prevention and care in NSW and Australia since the beginning of the 1980s.  
 Stevie Clayton
- Bug Breakfast in the Bulletin**
- 101 Refugee health**  
 Susan Thomas, Paul Douglas, Mitchell Smith
- Communicable Diseases Report, NSW**
- 103 January and February 2010**
